

Maryland Department of Transportation Customer Service Plan Overview

The Maryland Department of Transportation is a customer-driven leader that delivers safe, sustainable, intelligent, and exceptional transportation solutions in order to connect our customers to life's opportunities. The department has one mission statement to clearly define and communicate the primary direction for all business units and for the various transportation products and services provided throughout the state. This unified mission statement is the department's guiding light to the public served every day.

The Maryland Department of Transportation has objectives to: ensure safety and security of the transportation system; preserve and maintain the state's existing transportation infrastructure; maintain and enhance the quality of service to users; ensure programs conserve and enhance Maryland's natural, historic, and cultural resources; provide transportation options that support communities and quality of life; and support a healthy and competitive Maryland economy.

Every Department of Transportation employee is responsible for delivering exceptional customer service by providing customers with respectful, timely and knowledgeable responses to inquiries and interactions.

The Department of Transportation's Customer Service activities:

1. Improve the tracking, responsiveness, and time-to-resolution of all electronic, telephone, written, and in-person correspondence.

Providing consistent and responsive service to customers contacting the Department of Transportation is a top priority for the organization. The average wait time for customers contacting the call center during the first quarter of CY 2016 was 2 minutes 41 seconds. This number was higher than the benchmark of 60 seconds, but wait times between 2014 and 2015 show improvement. To continue the trend, MDOT has engaged in strategic development and process improvement with all three call centers.
