

Maryland Area Driver Rehabilitation Programs

This list of Driver Rehabilitation Specialists is provided for MARYLAND customer convenience. The listed providers are known to the Maryland Department of Transportation's Motor Vehicle Administration (MVA) to be able to complete driving assessments/evaluations for medical fitness to drive. These providers **are not** employees of the MVA and their assessments **are not** business transactions with the MVA.

Unless noted, the programs listed below provide an in-office clinical assessment followed by an on-the-road driving evaluation. For the programs that provide only clinical evaluations, information about the program that they are paired with to perform behind-the-wheel evaluations is provided.

A driver may require **adaptive equipment** (examples: spinner knob, hand controls, left-foot accelerator) and training. If a program can provide this additional service it will be listed as **ADAPTED**.

All of the programs listed provide evaluations for experienced drivers. Only a few offer evaluations for **First Time (Novice)** drivers, who have never before been a licensed driver. Those programs are noted.
