

MEMORANDUM

Date: May 15, 2015

TO: All Driving School Owners/Operators

FROM: William Kraft, Section Manager, Driver Educational Programs

SUBJECT: MVA Skills Test Change

Effective Tuesday, May 19, 2015, the Administration will launch a modification to the in-vehicle skills test for obtaining a class C non-commercial driver's license. On that date, the Administration will remove the parallel parking maneuver as a required test element on a statewide basis.

The MVA has no plans for removing this skill from its driver education curriculum, and asks that schools continue to include it in their driver training activities.

Any questions regarding this modification may be directed to the Driver Educational Programs section of the Driver Instructional Services Division.
