

The Maryland Traffic Records Forum provides an opportunity to bring together traffic records partners from throughout the state to share their experiences in supporting the National Highway Traffic Safety Administration's vision in promoting a comprehensive, efficient traffic records system. A high quality State traffic records system is critical to traffic safety programming, operational management, and strategic planning. The last Maryland Traffic Record Forum was held **May 29, 2014** at Conference Center at the Maritime Institute in Linthicum, MD
