

**James Stowe, PhD**

Clinical Research Specialist

Washington University School of Medicine

St. Louis, Missouri

[JSTOWE@DOM.wustl.edu](mailto:JSTOWE@DOM.wustl.edu)

Dr. Stowe is dedicated to helping older adults maintain safe mobility throughout the life course. He holds an MS in Gerontology from Kansas State University and a PhD in Human Development from the University of Missouri. Currently, he leads translational intervention trials in the School of Medicine's neuroscience driving simulation laboratory at Washington University in St. Louis. The purpose of the lab is to prolong safe driving life expectancy. He co-chairs the Missouri Coalition for Roadway Safety's Subcommittee on Elder Mobility and Safety -- a statewide group focused on the older driver portion of Missouri's Strategic Highway Safety Plan.
